## TECH SKILLS

**Frontend:** React, Next.js, Remix, TypeScript, JavaScript

**Styling:** Tailwind CSS, Bootstrap, Radix UI

**Backend & CMS:** Supabase, Strapi, Node.js

**Tools & Workflow:** Git, Jira, Figma

**Integrations:** Stripe (payments, checkout flows)

**Core Strengths:** Component-based architecture, CMS-driven development, Web Accessibility (a11y), SEO best practices

## EDUCATION

**Bachelor's Degree in Economic Informatics**

Dunărea de Jos University of Galați

2018 - 2021

## LANGUAGES

English (B2)

French (B1)

## PROFILE

Frontend Developer with 4+ years of experience building scalable web applications using React and Next.js, with strong focus on component architecture, CMS-driven platforms, and performance optimization. Experienced in developing theme builders, reusable UI systems, and high-traffic applications, including e-commerce and e-learning platforms.

Focused on accessibility and SEO best practices, contributing to improved search rankings and user experience across multiple projects.

## PROFESSIONAL EXPERIENCE

### Frontend Developer – IV Future | 2022 - Present

- Led a storefront team of 4 developers, ensuring consistency across multiple themes and UI implementations in e-commerce projects
- Built and maintained reusable component systems using React and TypeScript, improving development efficiency and reducing duplication across projects
- Developed high-performance landing pages optimized for SEO, contributing to improved search visibility and organic traffic
- Worked on CMS-driven platforms using Strapi, enabling non-technical teams to manage content efficiently
- Contributed to a dynamic Page & Theme Builder used for generating customizable layouts across e-commerce and landing page projects
- Developed features for a high-traffic e-learning platform with daily active users, focusing on performance, usability, and scalability
- Integrated Stripe payment system for online course purchases, handling frontend payment flows and user interactions
- Built and contributed to production applications using Next.js, Remix, and Supabase, supporting scalable frontend architecture and data-driven features

### Frontend Developer (Intern) – IV Future | Apr 2022 - Sept 2022

- Built interactive web components and small applications using HTML, CSS, and JavaScript
- Developed responsive layouts using Flexbox and Bootstrap
- Gained hands-on experience with React and Redux fundamentals
- Worked with Figma to translate UI designs into functional interfaces

## PROJECTS

### Restaurant Reservation Platform (Bodega)

- Designed and developed a reservation platform for a real local business, handling user booking flows and interaction logic
- Built a responsive, user-focused interface to streamline the reservation experience and reduce friction in booking
- Implemented dynamic form handling and state management for real-time user interactions

### ArchLens – Architecture Inspiration Platform

- Built a multi-page application using React / Next.js, integrating the Unsplash API to dynamically fetch and display architecture content
- Designed structured routing and categorized architectural styles, enabling scalable project listing and detail pages
- Optimized image loading and rendering for performance when handling media-heavy content
